

## DECK FAST™

DeckFast™, formerly Topec™ Deck System, is a modular slab formwork system that is used for commercial and industrial applications. The system will support slabs up to 22" and heights up to 19' above the floor or ground.

The basic DeckFast system consists of tubular post shores that are adjustable to 18', bearing supports and modular forming panels. The uniqueness of this system lies with bearing supports that capture and support corner clusters of four panels. When the bearing supports are fastened to flat top post shores, the panels and post shores can be erected individually from below, simplifying the erection process.
